### INVESTMENT PROCESS

- The Co-CIOs and their team of equity analysts employ Gotham's proprietary analytical framework to evaluate stocks within the coverage universe on measures of absolute and relative value.
- Gotham's equity research and risk controls are used to select long and short stock portfolios primarily from the U.S. large and mid-cap range.
- The long (short) portfolio is rebalanced daily to weight most heavily those stocks priced at the largest discount (premium) to Gotham's assessment of value.
- In general, as a company appears cheaper, it's weight in the portfolio increases.
- Risk for the fund is managed by limiting concentration in any one company, industry or sector. In addition, gross and net exposures are managed daily to remain within carefully defined ranges.

Mutual fund investing involves risks, including possible loss of principal. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. The fund will use leverage to make additional investments which could result in greater losses than if the fund were not leveraged. The fund utilizes swap agreements in its investment program. The use of derivatives such as swaps exposes the fund to additional risks including increased volatility, lack of liquidity and possible losses greater than the fund's initial investment. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover which may increase brokerage costs. The fund may invest in large, mid and small cap companies. Small and mid cap equity securities may be more volatile and less liquid than the securities of larger companies.

<sup>2</sup> Effective February 1, 2021, the prospectus was updated to reflect that Gotham will reduce its annual advisory fee for any fees and expenses the Fund incurs by investing in another mutual fund or ETF advised or sub-advised by Gotham. See the Prospectus and Summary Prospectus for additional details.

<sup>3</sup> The Adviser has contractually agreed to reduce its management fee and/or reimburse certain expenses of the Fund to the extent necessary to ensure that the Fund's "Other Expenses" as set forth in the Fund's "Annual Fund Operating Expenses" table in the summary section of its prospectus, do not exceed 0.00% (on an annual basis) of average daily net assets of the fund until January 31, 2026. The expense limitation is exclusive of certain expenses. See the Prospectus and Summary Prospectus for additional details.

## IMPORTANT INFORMATION

\*\* Inception Date: May 31, 2013.

The Morningstar Rating™ ("star rating") is calculated for funds with at least a 3-year history. Exchange-traded and open-end mutual funds are combined into a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each fund category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ is a weighted average of the performance figures associated with a fund's 3-, 5-, and 10-year (if applicable) Morningstar Rating™ metrics. In the Mid-Cap Blend category, for the trailing 3-year, 5-year, and 10-year time periods through 12/31/2023, GENIX was rated 5 stars among 385 funds, 3 stars among 363 funds, and 4 stars among 241 funds, respectively.

Morningstar category percentile rankings are based on a fund's total return compared to its Morningstar peer group of exchange-traded and open-end mutual funds. The highest percentile rank is 1 and the lowest percentile rank is 100. In the Mid-Cap Blend category, for the trailing 1-year, 5-year, and 10-year time periods through 12/31/2023, the Morningstar ranking was 9th percentile among 420 funds, 72nd percentile among 363 funds, and 55th percentile among 241 funds, respectively. © 2023 Morningstar, Inc.
