FundVantage Trust
(the "Trust")

Gotham Enhanced 500 Plus Fund
(the "Fund")

Supplement dated April 10, 2025 to the Fund's Summary Prospectus, Statutory Prospectus and Statement of Additional Information, each dated February 1, 2025, as supplemented to date.

For all existing and prospective shareholders of the Gotham Enhanced 500 Plus Fund:

- The Board of Trustees (the "Board") of the Trust has approved the reorganization of the Fund with and into the Gotham Index Plus Fund (the "Acquiring Fund"), which is expected to occur on or about May 9, 2025 (the "Reorganization").

- If you are an existing shareholder of the Fund, you will receive shares of the Acquiring Fund in exchange for your Fund shares upon the completion of the Reorganization. **No action is needed by you.**

On March 6, 2025, the Board of the Trust unanimously approved, on behalf of the Fund, the reorganization of the Fund into the Gotham Index Plus Fund. The Fund will continue to be managed by Gotham Asset Management, LLC ("Gotham" or the "Adviser"), the investment adviser for the Fund. The Board, including all of the Trustees who are not "interested persons" (as defined in the Investment Company Act of 1940, as amended (the "1940 Act")) of the Trust, determined that participation in the Reorganization is in the best interests of the Fund and that the interests of existing shareholders of the Fund will not be diluted as a result of the Reorganization.

The investment objective of the Fund is to seek long-term capital appreciation, whereas the investment objective of the Acquiring Fund is to seek to outperform the S&P 500® Index over most annual periods. The Fund and the Acquiring Fund have the same portfolio managers and substantially similar investment strategies.

It is anticipated that the Reorganization will occur on or around May 9. Following the Reorganization, the Fund will be dissolved.

The Reorganization will be conducted pursuant to an Agreement and Plan of Reorganization (the "Plan"). The Reorganization is expected to be treated as a tax-free reorganization under the U.S. Internal Revenue Code of 1986, as amended. As a result, Fund shareholders generally will not recognize a taxable gain (or loss) for U.S. tax purposes as a result of the Reorganization.

Upon completion of the Reorganization, you will hold Institutional Class shares of the Acquiring Fund with the same aggregate NAV as the Fund Institutional Class shares that you held immediately prior to the Reorganization.

Completion of the Reorganization is subject to a number of conditions under the Plan. The Reorganization does not require the consent of the shareholders of the Fund, and you are not being asked to vote on the Reorganization. Fund shareholders will receive a preliminary information statement/prospectus, which the Fund filed with the SEC on March 31, 2025, describing in detail both the Reorganization and a summary of the Board's considerations in approving the Reorganization.

In anticipation of the Reorganization, the Fund will be closed to new accounts beginning on April 17, 2025. Purchases, including exchange purchases, by existing shareholders will be accepted by the Fund until 4:00 p.m. Eastern Time on April 17, 2025. Redemptions, including exchange redemptions, into shares of another Gotham Fund of the Trust will be accepted until 4:00 p.m. Eastern Time on May 5, 2025. These dates may change if the closing date of the Reorganization changes.

* * * * *

In connection with the Reorganization discussed herein, a preliminary information statement/prospectus on Form N-14 was filed with the SEC on March 31, 2025. Investors are urged to read the materials and any other relevant documents when they become available because they will contain important information about the Reorganization. After they are filed, copies of the materials will be available for free on the SEC's web site at www.sec.gov. These materials also will be available at https://www.gothamfunds.com/documents and a paper copy can be obtained at no charge by calling (877) 974-6852.

This communication is for informational purposes only and does not constitute an offer to sell, nor a solicitation of an offer to buy, any securities.

Please retain this Supplement with your records.

GOTHAM ENHANCED 500 PLUS FUND

A Series of FundVantage Trust

Summary Prospectus – February 1, 2025

Class/Ticker: Institutional Class Shares (GEFPX)

Click here to view the Fund's Statutory Prospectus or Statement of Additional Information.

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund including the Fund's Statement of Additional Information ("SAI") and shareholder reports online at https://www.gothamfunds.com/documents. You can also get this information at no cost by calling (877) 974-6852, by sending an email request to info@gothamfunds.com, or from any financial intermediary that offers shares of the Fund. The Fund's prospectus, dated February 1, 2025, and SAI, dated February 1, 2025, as amended from time to time, are incorporated by reference into this Summary Prospectus.

Investment Objective

The Gotham Enhanced 500 Plus Fund (the "Fund") seeks long-term capital appreciation.

Expenses and Fees

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Shareholder Fees (fees paid directly from your investment):

	Institutional Class
Redemption Fee (as a percentage of amount redeemed within 30 days of purchase)	1.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fees	1.00%
Distribution and/or Service (Rule 12b-1) Fees	None
Other Expenses	3.39%
Dividend and Interest Expense on Securities Sold Short	0.87%
Other Operating Expenses	2.52%
Total Annual Fund Operating Expense[1]	**4.39%**
Fee Waivers and/or Expense Reimbursements[1]	(2.37)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements[1]	**2.02%**

1 Gotham Asset Management, LLC ("Gotham" or the "Adviser") has contractually agreed to reduce its investment advisory fee and/or reimburse certain expenses of the Fund to the extent necessary to ensure that the Fund's total operating expenses (exclusive of taxes, "Acquired Fund Fees and Expenses," dividend and interest expense on securities sold short, interest, extraordinary items, and brokerage commissions), do not exceed 1.15% (on an annual basis) of average daily net assets of the Fund (the "Expense Limitation"). The Expense Limitation will remain in place until January 31, 2026, unless the Board of Trustees of FundVantage Trust (the "Trust") approves its earlier termination. The Adviser is entitled to recover, subject to approval by the Board of Trustees, such amounts reduced or reimbursed for a period of up to three (3) years from the date on which the Adviser reduced its compensation and/or assumed expenses for the Fund. The Adviser is permitted to seek reimbursement from the Fund, subject to certain limitations, for fees it waived and Fund expenses it paid to the extent the total annual fund operating expenses do not exceed the limits described above or any lesser limits in effect at the time of reimbursement. No recoupment will occur unless the Fund's expenses are below the Expense Limitation.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest $10,000 in the Fund's Institutional Class shares for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (reflecting any contractual fee waivers). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Institutional Class	$205	$1,115	$2,036	$4,387

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 167% of the average value of its portfolio.

Summary of Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing under normal circumstances in long and short positions of equity securities. The Adviser invests a portion of the assets in securities included in the S&P 500® Index (the "Index") but not necessarily in the same weightings within the Index (the "Long Portfolio"). The Fund also has additional exposure to a long/short portfolio (the "Long/Short Portfolio"), consisting of long and short positions in securities listed in the Index, but may invest in other large capitalization companies, generally selected from the largest 500 – 700 U.S. companies based on market capitalization. *The Fund is not a passive index fund, but instead utilizes an enhanced index or "index plus" strategy.*

The Long Portfolio generally consists of long positions in the securities that comprise the Index that are weighted based on the Adviser's assessment of value and the individual security's Index weight. The Long/Short Portfolio consists of long positions in securities that the Adviser believes to be undervalued and short positions in securities that the Adviser believes to be overvalued, based on the Adviser's analysis of the issuer's financial reports and market valuation.

The Adviser seeks to maintain the Fund's net exposure, which is the value of the Fund's long positions minus its short positions, in the range of approximately 70 – 100% during normal market conditions. The Adviser expects that the Fund's gross exposure, which is the value of the Fund's long positions plus its short positions, will be in the range of 160%–220% under normal circumstances.

In determining which individual securities to purchase or short for the Long/Short Portfolio, the Adviser employs a systematic, bottom-up, valuation approach based on the Adviser's proprietary analytical framework to identify companies that appear to be undervalued or overvalued on both an absolute and relative basis. This approach consists of:

- Researching and analyzing each company in the Adviser's coverage universe according to a methodology that emphasizes fundamentals such as recurring earnings, cash flows, capital efficiency, capital structure, and valuation;
- Identifying and excluding companies that do not conform to the Adviser's valuation methodology or companies judged by the Adviser to have questionable financial reporting;
- Updating the analysis for earning releases, annual (Form 10-K) and quarterly (Form 10-Q) reports and other corporate filings; and
- Recording analysis in a centralized database enabling the Adviser to compare companies and identify longs and shorts based on the Adviser's assessment of value.

Generally, the long portion of the Long/Short Portfolio is weighted towards those stocks that are priced at the largest discount to the Adviser's assessment of value. Similarly, the short portion of the Long/Short Portfolio is generally weighted towards those short positions selling at the largest premium to the Adviser's measures of value. The Long/Short Portfolio is also subject to the Adviser's risk controls, which include liquidity and diversification considerations.

The Fund is rebalanced (generally daily) to maintain exposure levels, manage risk and reposition the portfolio to reflect earnings releases and other new information related to particular companies.

The Fund may also lend portfolio securities to brokers, dealers and other financial organizations meeting capital and other credit requirements or other criteria established by the Fund's Board of Trustees. Loans of portfolio securities will be collateralized by liquid securities and cash. The Fund may invest cash collateral received in securities consistent with its principal investment strategy. The Fund's investment of the proceeds of short sales creates leverage in the Fund which may amplify changes in the Fund's net asset value. Because the Fund generally rebalances its long and short positions within the Long/Short Portfolio daily, the Fund will experience a high portfolio turnover rate.

Summary of Principal Risks

The Fund is subject to the principal risks summarized below. The order of the below risk factors does not indicate the significance of any particular risk factor and the relative significance of each risk below may change over time. These risks could adversely affect the Fund's net asset value ("NAV"), yield and total return. It is possible to lose money by investing in the Fund.

- **Equity Risk:** The Fund invests primarily in equity and equity-related securities. Equity and equity-related securities are subject to greater fluctuations in market value than certain other asset classes. Factors that could impact the market value include a company's business performance, investor perceptions, stock market trends and general economic conditions. The rights of equity holders are subordinate to all other claims on a company's assets, including debt holders. Equity ownership risks the loss of all or a substantial portion of the investment.
- **Market Risk:** The values of, and/or the income generated by, securities held by the Fund may decline due to factors that are specifically related to a particular company, as well as general market conditions, such as real or perceived adverse economic or political conditions, inflation rates and/or investor expectations concerning such rates, changes in interest rates, or adverse investor sentiment generally. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Geopolitical events, including terrorism, tensions or open conflict between nations, or political or economic dysfunction within some nations that are global economic powers, may lead to instability in world economies and markets, may lead to increased market volatility, and may have adverse long-term effects. Events such as environmental and natural disasters, public health crises (such as epidemics and pandemics), social unrest, and cybersecurity incidents, and governments' reactions to such events, could cause uncertainty in the markets and may adversely affect the performance of the global economy.
- **Value Style Risk:** The Adviser buys securities, on behalf of the Fund, that it believes are undervalued. Investing in "value" stocks presents the risk that the stocks may never reach what the Adviser believes are their full market values, either because the market fails to recognize what the Adviser considers to be the companies' true business values or because the Adviser misjudges those values. In addition, value stocks may fall out of favor with investors and underperform other stocks (such as growth stocks) during given periods. Conversely, the Fund shorts securities the Adviser believes are overvalued. This presents the risk that a stock's value may not decrease to what the Adviser believes is its true market value because the market fails to recognize what the Adviser considers to be the company's value, because the Adviser misjudges that value or because the Adviser is required to purchase the security before its investment thesis could be realized.
- **Short Sale Risk:** Short selling a security involves selling a borrowed security with the expectation that the value of that security will decline so that the security may be purchased at a lower price when returning the borrowed security. The risk for loss on short selling is greater than the original value of the securities sold short because the price of the borrowed security may rise, thereby increasing the price at which the security must be purchased. Any such loss is increased by the amount of premium or interest the Fund must pay to the lender of the security. Likewise, any gain will be decreased by the amount of premium or interest the Fund must pay to the lender of the security. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is limited only by the maximum attainable price of the security, less the price at which the security was sold and may, theoretically, be unlimited. Government actions also may affect the Fund's ability to engage in short selling. In addition, the Fund may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These types of short sales expenses (sometimes referred to as the "negative

cost of carry") negatively impact the performance of the Fund since these expenses tend to cause the Fund to lose money on a short sale even in instances where the price of the underlying security sold short does not change over the duration of the short sale. The Fund may not be able to borrow a security that it needs to deliver or it may not be able to close out a short position at an acceptable price and may have to sell long positions earlier than it had expected.

- **Leverage:** The Fund utilizes leverage in its investment program, including through its investment of short sale proceeds. Investing of short sale proceeds increases leverage because the Fund uses the proceeds to purchase additional securities consistent with the Fund's investment program. The use of leverage allows the Fund to make additional investments, thereby increasing its exposure to assets, such that its total assets may be greater than its capital. However, leverage also magnifies the volatility of changes in the value of the Fund's portfolio. The effect of the use of leverage by the Fund in a market that moves adversely to its investments could result in substantial losses to the Fund, which would be greater than if the Fund were not leveraged. Because a short position loses value as the security's price increases, the loss on a short sale is theoretically unlimited.

  The short sale proceeds utilized by the Fund to leverage investments are collateralized by all or a portion of the Fund's portfolio. Accordingly, the Fund may pledge securities in order to effect short sales, utilize short sale proceeds or otherwise obtain leverage for investment or other purposes. Should the securities pledged to brokers to secure the Fund's margin accounts decline in value, the Fund could be subject to a "margin call", pursuant to which the Fund must either deposit additional funds or securities with the broker or suffer mandatory liquidation of all or a portion of the pledged securities to compensate for the decline in value. The banks and dealers that provide leverage to the Fund have discretion to change the Fund's margin requirements at any time. Changes by counterparties in the foregoing may result in large margin calls, loss of leverage and forced liquidations of positions at disadvantageous prices. There can be no assurance that the Fund will be able to secure or maintain adequate leverage to pursue its investment strategy. The utilization of short sale proceeds for leverage will cause the Fund to be subject to higher transaction fees and other costs.

- **Strategy Risk:** Because the Fund utilizes an enhanced index or "index plus" strategy and the Adviser actively manages individual securities in addition to the Index Investment, the Fund's investment exposure to individual securities will not match those of the Index and the Fund's performance may not correlate with the performance of an Index.

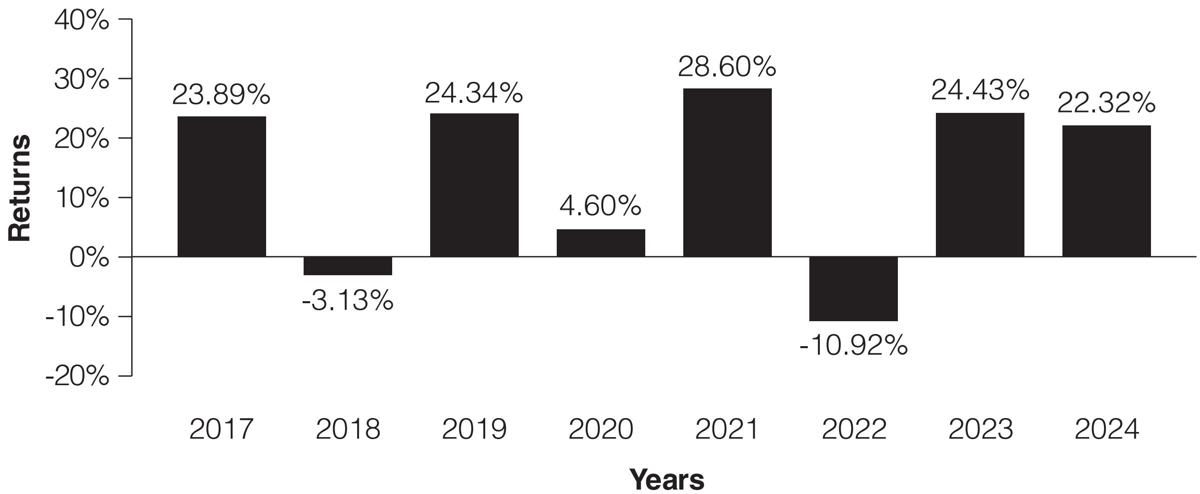
- **Database Errors:** The investment strategy used by the Adviser relies on proprietary databases and third-party data sources. Data entries made by the Adviser's team of financial analysts or third-parties may contain errors, as may the database system used to store such data. Any errors in the underlying data sources, data entry or database may result in the Fund acquiring or selling investments based on incorrect information. When data proves to be incorrect, misleading, flawed or incomplete, any decisions made in reliance thereon expose the Fund to potential risks. For example, by relying on such data the Adviser may be induced to buy or sell certain investments it would not have if the data was correct. As a result, the Fund could incur losses or miss out on gains on such investments before the errors are identified and corrected.

- **Systems Risk:** The Fund depends on the Adviser to develop and implement appropriate systems for its activities. The Adviser relies extensively on computer programs and systems to implement and monitor the Fund's investment strategy. The development, implementation and maintenance of these systems is complex and involves substantial research and modeling (which is then generally translated into computer code and manual and automated processes) and the retrieval, filtering, processing, translation and analysis of large amounts of financial and other corporate data. As a result, there is a risk of human or technological errors affecting the portfolio construction process and order origination, including errors in programming (e.g., "bugs" and classic coding errors), modeling, design, translational errors and compatibility issues with data sets and among systems. Similarly, with regard to trading and other systems or equipment that the Adviser utilizes, any or all of the following events may occur: (i) failures or interruptions in access to or the operations of such systems or equipment; (ii) loss of functionality; (iii) corruption; (iv) compromises in security; (v) loss of power; and (vi) other situations that adversely affect such systems or equipment. There can be no guarantee that such defects or issues will be identified in time to avoid a material adverse effect on the Fund. For example, such failures could cause the Adviser to be induced to buy or sell certain investments it would not have if the failure had not occurred.

- **High Portfolio Turnover Risk:** The Fund may sell its securities, regardless of the length of time that they have been held, if the Adviser determines that it would be in the Fund's best interest to do so. The Fund frequently adjusts the size of its long and short positions. These transactions increase the Fund's "portfolio turnover" and the Fund will experience a high portfolio turnover rate (over 100%). High turnover rates generally result in higher brokerage costs, may have adverse tax consequences and therefore may reduce the Fund's returns. Frequent purchases and sales of portfolio securities may result in higher Fund expenses and may result in more significant distributions of short-term capital gains to investors, which are taxed as ordinary income.

Performance Information

The bar chart and performance table shown below provide some indication of the risks of investing in the Fund by showing the Fund's performance for the past eight calendar years and by showing how the Fund's average annual returns for one year, five years and since inception periods compared with those of the S&P 500® Total Return Index, a broad measure of market performance. Performance reflects contractual fee waivers in effect. If fee waivers were not in place, performance would be reduced. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at *www.GothamFunds.com* or by calling the Fund toll-free at (877) 974-6852.



During the periods shown in the chart:

Best Quarter	Worst Quarter
17.68%	(21.26)%
(June 30, 2020)	(March 31, 2020)

Gotham Enhanced 500 Plus Fund Class I Shares Average Annual Total Returns for the periods ended December 31, 2024	1 Year	5 Years	Since Inception (September 30, 2016)
Class I Shares Return Before Taxes	22.32%	12.77%	13.55%
Return After Taxes on Distributions[1]	18.73%	10.48%	11.23%
Return After Taxes on Distributions and Sale of Shares[1]	15.75%	9.80%	10.56%
The S&P 500® Total Return Index (reflects no deduction for fees, expenses or taxes)[2]	25.02%	14.53%	14.85%

1 After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

2 The S&P 500® Total Return Index is a widely recognized unmanaged index of 500 common stocks, which are generally representative of the U.S. stock market as a whole. The returns provided for the S&P 500® Total Return Index include the reinvestment of dividends.

Management of the Fund

Investment Adviser

Gotham Asset Management, LLC serves as the Fund's investment adviser.

Portfolio Managers

- **Joel Greenblatt** is a Managing Principal and Co-Chief Investment Officer of Gotham and has been a Portfolio Manager to the Fund since its inception in 2016.
- **Robert Goldstein** is a Managing Principal and Co-Chief Investment Officer of Gotham and has been a Portfolio Manager to the Fund since its inception in 2016.

Purchase and Sale of Fund Shares

Shares of the Fund may be purchased and sold (redeemed) on any business day when the New York Stock Exchange (the "Exchange") is open for regular trading. Such purchases and redemptions can be made through a broker-dealer or other financial intermediary or directly with the Fund by sending a completed application to the addresses below. **For applications and more information call Shareholder Services toll-free at (877) 974-6852 ("Shareholder Services").**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains. Such distributions are not currently taxable when shares are held through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. However, subsequent withdrawals from any tax-deferred account in which the shares are held may be subject to federal income tax. All prospective investors and shareholders are urged and advised to consult their own tax adviser regarding the effects of an investment in a Fund on their particular tax situation.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. In addition, if you purchase the Fund through a broker-dealer, you may be required to pay a commission to your broker depending on your arrangements with them. Ask your salesperson or visit your financial intermediary's website for more information or visit *www.GothamFunds.com*.
