

GOTHAM NEUTRAL 500 FUND

A Series of FundVantage Trust

Summary Prospectus – February 1, 2021

Class/Ticker: Institutional Class Shares (GONFX)

Click here to view the Fund's [Statutory Prospectus](#) or [Statement of Additional Information](#).

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund including the Fund's Statement of Additional Information ("SAI") and shareholder reports online at <https://www.gothamfunds.com/performance.aspx>. You can also get this information at no cost by calling (877) 974-6852, by sending an email request to info@gothamfunds.com, or from any financial intermediary that offers shares of the Fund. The Fund's prospectus, dated February 1, 2021, and SAI, dated February 1, 2021, as amended from time to time, are incorporated by reference into this Summary Prospectus.

As permitted by the Securities and Exchange Commission, paper copies of the Gotham Funds' annual and semi-annual shareholder reports are no longer sent by mail, unless you specifically request paper copies of the shareholder reports from the Gotham Funds or from your financial intermediary. Instead, annual and semi-annual shareholder reports are available on the Gotham Funds' website (www.GothamFunds.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future annual and semi-annual shareholder reports in paper, free of charge. To elect to receive paper copies of shareholder reports through the mail or otherwise change your delivery method, contact your financial intermediary or, if you hold your shares directly through the Gotham Funds, call the Gotham Funds toll-free at 1 (877) 974-6852 or write to the Gotham Funds at Gotham Funds, FundVantage Trust, c/o BNY Mellon Investment Servicing, P.O. Box 9829, Providence, RI 02940-8029. Your election to receive shareholder reports in paper will apply to all Gotham Funds that you hold through the financial intermediary, or directly with the Gotham Funds.

Investment Objective

The Gotham Neutral 500 Fund (the "Fund") seeks long-term capital appreciation with minimal correlation to the general stock market.

Expenses and Fees

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment):

	Institutional Class
Redemption Fee (as a percentage of amount redeemed within 30 days of purchase)	1.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):	
Management Fees.	1.35%
Distribution and/or Service (Rule 12b-1) Fees	None
Other Expenses.	2.76%
Dividend and Interest Expense on Securities Sold Short	1.53%
Other Operating Expenses	1.23%
Total Annual Fund Operating Expenses¹.	4.11%
Fee Waivers and/or Expense Reimbursements ¹	(1.23)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements¹.	2.88%

¹ Gotham Asset Management, LLC ("Gotham" or the "Adviser") has contractually agreed to reduce its investment advisory fee and/or reimburse certain expenses of the Fund to the extent necessary to ensure that the Fund's total

operating expenses (exclusive of taxes, "Acquired Fund Fees and Expenses," dividend and interest expense on securities sold short, interest, extraordinary items, and brokerage commissions), do not exceed 1.35% (on an annual basis) of average daily net assets of the Fund (the "Expense Limitation"). Prior to February 1, 2019, the Expense Limitation was 1.50%. The Expense Limitation will remain in place until January 31, 2022, unless the Board of Trustees of FundVantage Trust (the "Trust") approves its earlier termination. The Adviser is entitled to recover, subject to approval by the Board of Trustees, such amounts reduced or reimbursed for a period of up to three (3) years from the date on which the Adviser reduced its compensation and/or assumed expenses for the Fund. The Adviser is permitted to seek reimbursement from the Fund, subject to certain limitations, for fees it waived and Fund expenses it paid to the extent the total annual fund expenses do not exceed the limits described above or any lesser limits in effect at the time of reimbursement. No recoupment will occur unless the Fund's expenses are below the Expense Limitation.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund's Institutional Class shares for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Institutional Class	\$291	\$1,138	\$2,000	\$4,223

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 336% of the average value of its portfolio.

Summary of Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing under normal circumstances in long and short positions of equity securities. The Fund invests primarily in companies listed in the S&P 500® Index, but may invest in other large capitalization companies, generally selected from the largest 500 to 700 U.S. companies by market capitalization.

The Fund will generally take long positions in securities that the Adviser believes to be undervalued and short positions in securities that the Adviser believes to be overvalued, based on the Adviser's analysis of the issuer's financial reports and market valuation. It is anticipated that the Fund will hold several hundred long positions and a similar number of short positions.

The Adviser seeks to capitalize on pricing inefficiencies in the market by employing a systematic, bottom-up, valuation approach based on the Adviser's proprietary analytical framework to identify companies that appear to be undervalued or overvalued on both an absolute and relative basis. This approach consists of:

- Researching and analyzing each company in the Adviser's coverage universe according to a methodology that emphasizes fundamentals such as recurring earnings, cash flows, capital efficiency, capital structure, and valuation;
- Identifying and excluding companies that do not conform to the Adviser's valuation methodology or companies judged by the Adviser to have questionable financial reporting;
- Updating the analysis for earning releases, annual (Form 10-K) and quarterly (Form 10-Q) reports and other corporate filings; and
- Recording analysis in a centralized database enabling the Adviser to compare companies and identify longs and shorts based on the Adviser's assessment of value.

Generally the long portion of the portfolio is weighted towards those stocks that are priced at the largest discount to the Adviser's assessment of value. Similarly, the short portion of the portfolio is generally weighted towards those short positions selling at the largest premium to the Adviser's measures of value. The portfolio is also subject to the Adviser's risk controls, which include liquidity and diversification considerations. The Fund is rebalanced (generally daily) to maintain exposure levels, manage risk and reposition the portfolio to reflect earnings releases and other new information related to particular companies.

The Adviser seeks to maintain the Fund's net exposure, which is the value of the Fund's long positions minus its short positions, in the range of approximately 0% – 30%. The Adviser expects that the Fund's gross exposure, which is the value of the Fund's long positions plus its short positions, will generally be below 225%.

The Fund's investment of the proceeds of short sales creates leverage in the Fund which may amplify changes in the Fund's net asset value. The Fund may also lend portfolio securities to brokers, dealers and other financial organizations meeting capital and other credit requirements or other criteria established by the Fund's Board of Trustees. Loans of portfolio securities will be collateralized by liquid securities and cash. The Fund may invest cash collateral received in securities consistent with its principal investment strategy. Because the Fund generally rebalances its long and short positions on a daily basis, the Fund will experience a high portfolio turnover rate.

Summary of Principal Risks

The Fund is subject to the principal risks summarized below. These risks could adversely affect the Fund's net asset value ("NAV"), yield and total return. It is possible to lose money by investing in the Fund.

- **Equity Risk:** The Fund invests primarily in equity and equity-related securities. Equity and equity-related securities are subject to greater fluctuations in market value than certain other asset classes. Factors that could impact the market value include a company's business performance, investor perceptions, stock market trends and general economic conditions. The rights of equity holders are subordinate to all other claims on a company's assets, including debt holders. Equity ownership risks the loss of all or a substantial portion of the investment.
- **Market Risk:** The Fund is subject to market risk — the risk that securities markets and individual securities will increase or decrease in value. Market risk applies to every market and every security. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as "volatility", and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities' issuer or the markets in which they trade. Markets may additionally be impacted by negative external and/or direct and indirect economic factors such as pandemics, natural disasters, global trade policies and political unrest or uncertainties. The adverse impact of any one or more of these events on market value of fund investments could be significant and cause losses.
- **Value Style Risk:** The Adviser intends to buy securities, on behalf of the Fund, that it believes are undervalued. Investing in "value" stocks presents the risk that the stocks may never reach what the Adviser believes are their full market values, either because the market fails to recognize what the Adviser considers to be the companies' true business values or because the Adviser misjudges those values. In addition, value stocks may fall out of favor with investors and underperform other stocks (such as growth stocks) during given periods. Conversely, the Fund will short securities the Adviser believes are overvalued. This presents the risk that a stock's value may not decrease to what the Adviser believes is its true market value because the market fails to recognize what the Adviser considers to be the company's value, because the Adviser misjudges that value or because the Adviser is required to purchase the security before its investment thesis could be realized.
- **Short Sale Risk:** Short selling a security involves selling a borrowed security with the expectation that the value of that security will decline so that the security may be purchased at a lower price when returning the borrowed security. The risk for loss on short selling is greater than the original value of the securities sold short because the price of the borrowed security may rise, thereby increasing the price at which the security must be purchased.

Any such loss is increased by the amount of premium or interest the Fund must pay to the lender of the security. Likewise, any gain will be decreased by the amount of premium or interest the Fund must pay to the lender of the security. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is limited only by the maximum attainable price of the security, less the price at which the security was sold and may, theoretically, be unlimited. Government actions also may affect the Fund's ability to engage in short selling. In addition, the Fund may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These types of short sales expenses (sometimes referred to as the "negative cost of carry") negatively impact the performance of the Fund since these expenses tend to cause the Fund to lose money on a short sale even in instances where the price of the underlying security sold short does not change over the duration of the short sale. The Fund may not be able to borrow a security that it needs to deliver or it may not be able to close out a short position at an acceptable price and may have to sell long positions earlier than it had expected.

- **Leverage:** The Fund will utilize leverage in its investment program, including through its investment of short sale proceeds. Investing of short sale proceeds increases leverage because the Fund uses the proceeds to purchase additional securities consistent with the Fund's investment program. The use of leverage allows the Fund to make additional investments, thereby increasing its exposure to assets, such that its total assets may be greater than its capital. However, leverage also magnifies the volatility of changes in the value of the Fund's portfolio. The effect of the use of leverage by the Fund in a market that moves adversely to its investments could result in substantial losses to the Fund, which would be greater than if the Fund were not leveraged. Because a short position loses value as the security's price increases, the loss on a short sale is theoretically unlimited.

The short sale proceeds utilized by the Fund to leverage investments are collateralized by all or a portion of the Fund's portfolio. Accordingly, the Fund may pledge securities in order to effect short sales, utilize short sale proceeds or otherwise obtain leverage for investment or other purposes. Should the securities pledged to brokers to secure the Fund's margin accounts decline in value, the Fund could be subject to a "margin call", pursuant to which the Fund must either deposit additional funds or securities with the broker or suffer mandatory liquidation of all or a portion of the pledged securities to compensate for the decline in value. The banks and dealers that provide leverage to the Fund have discretion to change the Fund's margin requirements at any time. Changes by counterparties in the foregoing may result in large margin calls, loss of leverage and forced liquidations of positions at disadvantageous prices. There can be no assurance that the Fund will be able to secure or maintain adequate leverage to pursue its investment strategy. The utilization of short sale proceeds for leverage will cause the Fund to be subject to higher transaction fees and other costs.

- **Database Errors:** The investment strategy used by the Adviser relies on proprietary databases and third-party data sources. Data entries made by the Adviser's team of financial analysts or third-parties may contain errors, as may the database system used to store such data. Any errors in the underlying data sources, data entry or database may result in the Fund acquiring or selling investments based on incorrect information. When data proves to be incorrect, misleading, flawed or incomplete, any decisions made in reliance thereon expose the Fund to potential risks. For example, by relying on such data the Adviser may be induced to buy or sell certain investments it would not have if the data was correct. As a result, the Fund could incur losses or miss out on gains on such investments before the errors are identified and corrected.
- **Systems Risk:** The Fund depends on the Adviser to develop and implement appropriate systems for its activities. The Adviser relies extensively on computer programs and systems to implement and monitor the Fund's investment strategy. The development, implementation and maintenance of these systems is complex and involves substantial research and modeling (which is then generally translated into computer code and manual and automated processes) and the retrieval, filtering, processing, translation and analysis of large amounts of financial and other corporate data. As a result, there is a risk of human or technological errors affecting the portfolio construction process and order origination, including errors in programming (e.g., "bugs" and classic coding errors), modeling, design, translational errors and compatibility issues with data sets and among systems. Similarly, with regard to trading and other systems or equipment that the Adviser utilizes, any or all of the following events may occur: (i) failures or interruptions in access to or the operations of such systems or equipment; (ii) loss of functionality; (iii) corruption; (iv) compromises in security; (v) loss of power; and (vi) other situations that adversely affect such systems or equipment. There can be no guarantee that such defects or issues will

be identified in time to avoid a material adverse effect on the Fund. For example, such failures could cause the Adviser to be induced to buy or sell certain investments it would not have if the failure had not occurred.

- **High Portfolio Turnover Risk:** The Fund may sell its securities, regardless of the length of time that they have been held, if the Adviser determines that it would be in the Fund's best interest to do so. It is anticipated that the Fund will frequently adjust the size of its long and short positions. These transactions will increase the Fund's "portfolio turnover" and the Fund will experience a high portfolio turnover rate (over 100%). High turnover rates generally result in higher brokerage costs, may have adverse tax consequences and therefore may reduce the Fund's returns. Frequent purchases and sales of portfolio securities may result in higher Fund expenses and may result in more significant distributions of short-term capital gains to investors, which are taxed as ordinary income.
- **Securities Lending Risk:** The Fund may make secured loans of its portfolio securities in an amount not exceeding 33 $\frac{1}{3}$ % of the value of the Fund's total assets. The risks in lending portfolio securities, as with other extensions of credit, consist of possible delay in recovery of the securities and possible loss of rights in the collateral should the borrower fail financially, including possible impairment of the Fund's ability to vote the securities on loan. If a loan is collateralized by cash, the Fund typically invests the cash collateral for its own account and may pay a fee to the borrower that normally represents a portion of the Fund's earnings on the collateral. Because the Fund may invest collateral in any investments in accordance with its investment objective, the Fund's securities lending transactions will result in investment leverage. The Fund bears the risk that the value of investments made with collateral may decline.

Performance Information

The bar chart and table shown below provide some indication of the risks of investing in the Fund by showing the Fund's performance for the past four calendar years and by showing how the Fund's average annual returns for one year and since inception periods compared with those of the BofA Merrill Lynch 3-Month U.S. Treasury Bill Index. Performance reflects contractual fee waivers in effect. If fee waivers were not in place, performance would be reduced. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available by calling the Fund toll-free at (877) 974-6852.

During the periods shown in the chart:

<u>Best Quarter</u>	<u>Worst Quarter</u>
5.36%	(8.42)%
(December 31, 2017)	(March 31, 2020)

Gotham Neutral 500 Fund Class I Shares Average Annual Total Returns for the periods ended December 31, 2020	1 Year	Since Inception (September 30, 2016)
Class I Shares Return Before Taxes	(11.72)%	0.72%
Return After Taxes on Distributions ¹	(11.97)%	0.44%
Return After Taxes on Distributions and Sale of Shares ¹	(6.94)% ²	0.53% ²
The BofA Merrill Lynch 3-Month U.S. Treasury Bill Index (reflects no deductions for fees or expenses or taxes) ³	0.67%	1.35%

- ¹ After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.
- ² The “Return After Taxes on Distributions and Sale of Shares” is higher than the “Class I Return Before Taxes” and/or the “Return After Taxes on Distributions” because of realized losses that would have been sustained upon the sale of Fund shares immediately after the relevant period.
- ³ The BofA Merrill Lynch 3-Month U.S. Treasury Bill Index is an index comprised of a single Treasury bill issue purchased at the beginning of the month and held for a full month, then sold and rolled into a newly selected Treasury bill issue.

Management of the Fund

Investment Adviser

Gotham Asset Management, LLC serves as the Fund’s investment adviser.

Portfolio Managers

- **Joel Greenblatt** is a Managing Principal and Co-Chief Investment Officer of Gotham and has been a Portfolio Manager to the Fund since its inception in 2016.
- **Robert Goldstein** is a Managing Principal and Co-Chief Investment Officer of Gotham and has been a Portfolio Manager to the Fund since its inception in 2016.

Purchase and Sale of Fund Shares

Shares of the Fund may be purchased and sold (redeemed) on any business day when the New York Stock Exchange (the “Exchange”) is open for regular trading. Such purchases and redemptions can be made through a broker-dealer or other financial intermediary or directly with the Fund by sending a completed application to the addresses below. **For applications and more information call Shareholder Services toll-free at (877) 974-6852 (“Shareholder Services”).**

Regular Mail:

4400 Computer Drive
Westborough, MA 01581-1722

Purchase by Wire for Accounts Held Directly with the Fund

Please contact Shareholder Services toll-free at (877) 974-6852 for current wire instructions.

Minimum Investment Requirements

The minimum initial investment for shares is \$25,000 and the minimum for each subsequent investment is \$250.

Redemption by Telephone for Accounts Held Directly with the Fund

Call Shareholder Services toll-free at (877) 974-6852.

Purchases and Redemptions for Accounts Held through a Financial Intermediary

Contact your financial intermediary.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains. Such distributions are not currently taxable when shares are held through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. However, subsequent withdrawals from any tax-deferred account in which the shares are held may be subject to federal income tax.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. In addition, if you purchase the Fund through a broker-dealer, you may be required to pay a commission to your broker depending on your arrangements with them. Ask your salesperson or visit your financial intermediary's website for more information or visit www.GothamFunds.com.
