<sup>1</sup>Inception Date: March 31, 2015.

<sup>2</sup>A preference for long-term gains is an objective established and followed by Gotham, is not formal policy of the fund, and is subject to change at any time.

The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. The performance quoted does not reflect a 1% redemption fee on shares redeemed within 30 days of purchase. Returns would have been lower if certain expenses had not been reduced or reimbursed. Current performance may be lower or higher than the performance quoted here. To obtain performance current to the most recent month-end, please call 877-974-6852.

The Morningstar Rating™ ("star rating") is calculated for funds with at least a 3-year history. Exchange-traded and open-end mutual funds are combined into a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each fund category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ is a weighted average of the performance figures associated with a fund's 3-, 5-, and 10-year (if applicable) Morningstar Rating™ metrics. In the Large Blend category, for the trailing 3-year, 5-year, and 10-year time periods through 3/31/2025, GINDX was rated 5 stars among 1,272 funds, 5 stars among 1,169 funds, and 5 stars among 889 funds, respectively.

Morningstar category percentile rankings are based on a fund's total return compared to its Morningstar peer group of exchange-traded and open-end mutual funds. The highest percentile rank is 1 and the lowest percentile rank is 100. For the trailing one-year, five-year, and ten-year time periods through 3/31/2025, the Morningstar ranking was 32<sup>nd</sup> percentile among 1,373 Large Blend Equity funds, 5<sup>th</sup> percentile among 1,169 Large Blend Equity funds, and 4<sup>th</sup> percentile among 889 Large Blend Equity funds, respectively. © 2025 Morningstar, Inc. The S&P 500 Total Return Index is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The performance and volatility of the fund will be different than those of the indexes. The indexes are unmanaged and investors cannot invest directly in the indexes.

### PORTFOLIO MANAGERS

#### Joel Greenblatt

*Managing Principal & Co-Chief Investment Officer*

Mr. Greenblatt serves as Managing Principal and Co-Chief Investment Officer of Gotham Asset Management, the successor to Gotham Capital, an investment firm he founded in 1985. For over two decades, Mr. Greenblatt was a professor on the adjunct faculty at Columbia Business School teaching "Value and Special Situation Investing." Mr. Greenblatt formerly served as a director of Pzena Investment Management, Inc., a global investment management firm, and on the Investment Boards of the University of Pennsylvania and the UJA Federation. Mr. Greenblatt is the author of *You Can Be A Stock Market Genius* (Simon & Schuster, 1997), *The Little Book that Beats the Market* (Wiley, 2005), *The Little Book that Still Beats the Market* (Wiley, 2010), *The Big Secret for the Small Investor* (Random House, 2011), and *Common Sense – The Investor's Guide to Equality, Opportunity, and Growth* (Columbia University Press, 2020). He was formerly the Chairman of the Board of Alliant Techsystems, a NYSE-listed aerospace and defense contractor. He holds a BS (1979), and an MBA (1980) from the Wharton School of the University of Pennsylvania.

#### Robert Goldstein

*Managing Principal & Co-Chief Investment Officer*

Mr. Goldstein serves as Managing Principal and Co-Chief Investment Officer of Gotham Asset Management, the successor to Gotham Capital, which he joined in 1989. Mr. Goldstein also founded and served as Managing Partner (1989-1997) of Metropolis Partners, a value and special situation investment partnership managing capital on behalf of institutions and wealthy individuals before returning capital to outside investors at the end of 1997. Mr. Goldstein currently serves on the Board of Trustees of the Museum of the City of New York. He holds a BA (1988), magna cum laude, from Tufts University.

### INVESTMENT PROCESS

- Gotham invests a portion of the assets in securities intended to track or exceed the performance of the S&P 500 Index and additional exposure to a long/short portfolio, consisting of long and short positions, generally selected from the largest 500 to 700 U.S. companies by market capitalization.
- For the long/short Portfolio, Gotham's process compares and ranks stocks within its research universe on measures of absolute and relative value. Long portfolios are constructed from the most undervalued stocks, while short portfolios are composed of the most overvalued stocks.
- The long (short) portfolio is rebalanced daily to weight most heavily those stocks priced at the largest discount (premium) to Gotham's assessment of value.
- In general, as a company appears cheaper, its weight in the portfolio increases.
- Risk for the fund is managed by limiting concentration in any one company, industry or sector. In addition, gross and net exposures are managed daily to remain within carefully defined ranges.
- In summary, the fund aims to generate returns from two sources: (1) the performance of the large-cap index-tracking investment and (2) the "spread" between returns on Gotham's long positions versus its short positions.

### IMPORTANT INFORMATION

Source: Gotham, unless otherwise indicated. The information herein is correct to the best of the knowledge of Gotham as of the date indicated and is subject to change without notice.

Mutual fund investing involves risks, including possible loss of principal. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. The fund will use leverage to make additional investments which could result in greater losses than if the fund were not leveraged. The fund utilizes swap agreements in its investment program. The use of derivatives such as swaps exposes the fund to additional risks including increased volatility, lack of liquidity and possible losses greater than the fund's initial investment. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover which may increase brokerage costs. The fund may invest in large, mid and small cap companies. Small and mid cap equity securities may be more volatile and less liquid than the securities of larger companies.

An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and summary prospectus contains this and other information about the fund.
